Dear Sir,

With this letter I would like to express my gratitude on the work performed so far from the Inspire team on the design and development of the 'PharmaTrack' platform, the data processing system which our company uses for the data management (data loading, harmonising and coding of pharmacy data we receive from various sources). Additionally, the system is used for sample management and data extrapolation purposes as well for statistical validations of various data types like prices, sales etc.

During the last year we had an extremely good cooperation with your team having the opportunity to work on novelty ideas which have been incorporated to the system.

Although further development is on the works out of the first stage of this project we are now in a position to standardise our processes, automate certain areas of the operation, improve significantly quality of reported data and reduce processing time (which before was performed based on various external programs) by 80%.

We are looking forward for further and fruitful cooperation with you and your team

Sincerely

Pambos Charalambous
