To the attention of Mr. Panagiotis Andreou

TO WHOM IT MAY CONCERN

This is to confirm that the Building Management Software, developed for our company, with the assistance and expertise of UCLAN University/ Computer Science Department, under the supervision of Mr. Panagiotis Andreou, has been proofed extremely effective, as it helped to the increase of our productivity through minimization of time consumed for the data management, as well as increase of our company's capabilities in maximising the volume of work that can be processed.

Moreover, it is important to be noted that the software is running for more than two years now, without having any functional problems.

It is also important, that the operator can access the software from anywhere with internet connection and get/ import any data required to carry out the job.

Yours sincerely,

George Tsiartziazis

Sales Manager
